PO4: A Study of a Measuring Method of Wheelchair Seated Posture

Takashi Kinose, OT

For wheelchair seated posture measurement, the international standard ISO16840 which defines terms and measurement rules of seated posture has been globally adopted. This study evaluated a measuring method using the inclination angle measuring device (HORIZON) to measure seated posture.

Learning Objectives:

- List two wheelchair seated posture measurement tools
- List three components of the international standard ISO16840 which defines terms and measurement rules of seated posture
- Describe the purpose of the inclination angle measuring device (HORIZON) to measure seated posture
